

Warren L. Williams, AIA

Warren Williams is a principal in architecture firm Lord Aeck Sargent's (LAS) Science practice area, where he provides comprehensive building design services for biomedical teaching and research laboratories. He applies cutting-edge facilities design and management skills to elite, architectural construction projects.

Williams joined LAS as an architect intern in 1991 and worked his way up. He was promoted to principal in January 2007. Some of his current and more recently completed projects include: campus planning and renovation projects at Morehouse School of Medicine; the University of West Florida Science & Technology Complex; the Florida State University King Life Sciences Teaching & Research Center (for which LAS is the laboratory architect); the Georgia Public Health Laboratories in Decatur, Ga., and Waycross, Ga.; and the University of Michigan Medical School's Cyclotron building addition.

Williams is a member of the American Institute of Architects and the National Organization of Minority Architects. He earned his bachelor's degree in architecture from the University of Florida in 1984. He and his wife and three children are residents of Decatur, Georgia.
